- Major: Software Development
- Relevant coursework: Professional practices in IT, Software Deployment and Operation.
- WAM: 87/100

03/2021 – 11/2023

Bachelor of Computer Science

Swinburne University of Technology, Hawthorn, VIC

- Major: Software Development.
- Relevant coursework: Cloud Computing Architecture, Software Development in Mobile Devices, Algorithms and Data Structures.
- GPA: 3.5/4.0

Technical Skills

Web & Mobile Development: HTML, CSS, React, Bootstrap, Vue.js, JavaScript, Kotlin, XML, C#.

Backend Development: Node.js, PHP, Express.js, MySQL, MongoDB, Postman, Python.

Tools: Jenkins, AWS, Docker, Azure, Terraform, GitHub, Figma, Adobe XD.

University Projects

03/2025 – 06/2025

Feed Formulation Portal (Group Project)

Deakin Capstone Project B, Burwood VIC

- Guided a team of 30 to recreate the PHP website using React, Node.js and MySQL.
- Acted as a bridge between the client and the team to gather requirements and manage expectations.
- Planned and executed two Agile sprints using Microsoft Planner to plan and track progress.

09/2024 – 10/2024	DevOps pipeline with AWS (Individual Project) Deakin's unit (Software Deployment and Operation), Burwood, VIC - Created a DevOps pipeline, streamlining the creation of 3 AWS services (ECR, EKS, EC2) using GitHub Actions, reducing deployment time by 50%. - View the demonstration video via this link.
07/2024 – 10/2024	Feed Formulation Portal (Group Project) Deakin Capstone Project A, Burwood VIC - Led a team of 10 to develop a web application for marine feed formulation and raw ingredient management using PHP, UserSpice, MySQL, and Bootstrap. - Created the UX/UI prototype in Figma, resulting in a 25% improvement in user satisfaction based on feedback from testing. - Facilitated the deployment of the project to a live website. View the live website via this link.
03/2023 – 10/2023	SMS bulk sending Android application (Group Project) Swinburne Final Year Industry Project, Hawthorn VIC - Directed the Android development team of 3 to build an app capable of sending bulk SMS to over 1,000 clients using Kotlin, Android Studio, and REST/HTTP. - Increased operational efficiency by 20% for the business by improving client communication.

Relevant Experience

01/2024 – 03/2024	Summer Tech LIVE 2024 program (Internship) Inverloch Bike Hire, Remote - Collaborated with a peer developer to implement a management system based on the client's existing applications using WordPress, MySQL, PHP, JavaScript, jQuery, and Ajax. - Conducted user testing, achieving a 95% user satisfaction rate after creating the system.
01/2023 – 01/2023	Summer Software Developer Internship (100 hours) Virtetic, Melbourne VIC - Collaborated with senior developers to prototype and create a menu feature in Unity and C#, enhancing game navigation efficiency. - Integrated 5+ 3D assets into the game environment, which enhanced the user experience and improved the flow of gameplay.
