

Joe Cin NG

Burwood, VIC 3125 | www.linkedin.com/in/joe-cin-ng-457a61243 | <https://github.com/joecinng>

Objective

Highly motivated Computer Science student eager to contribute to developing client applications. I am keen to gain practical experience in software testing, CI/CD systems, and UX/UI design through different work experiences.

Skills

- Good understanding of OOP and Software Development LifeCycle
- Experience with Git for version control and Jenkins for CI/CD
- Familiar with Adobe XD and Figma for UX/UI design
- Excellent communication and teamwork skills gained through group projects and internships
- Web Technologies: HTML, React, Laravel, Bootstrap, Vue.js, PHP, C#, MySQL
- Mobile development: Kotlin, XML, Android Studio
- Experience with unit testing, integration testing, and test automation

Professional Experience

Summer Tech Internship | Inverloch Bike Hire

January 2024 – March 2024

- Collaborated with a peer developer to develop a management system based on the client's existing applications
- Contributed to the design and implementation of user interface elements for web application
- Used WordPress, MySQL, PHP, JavaScript, jQuery, and Ajax to build a well-integrated backend and frontend bike management system for the administrator and online customer

Final Year Industry Project | Swinburne University of Technology

March 2023 – October 2023

- Worked in a team of six members to develop a software suite of web and mobile application
- Designed the user interface and implemented UX improvements using Adobe XD
- Contributed to the mobile development and integrated cloud APIs like App Script and Google Sheets
- Worked with Mobile technologies such as SQK, SQLite, Broadcast Receiver, REST/HTTP, IntentService
- Collaborated with the team using Agile methodology and implemented version control using GitHub
- Used Kotlin, XML, SQL, and Android Studio to develop an Android application with features to send bulk messages, import customer lists, and update received messages to Google Sheets

Summer Software Developer Internship | Virtetic

02 - 27 Jan 2023

- Collaborated with senior developers to design, prototype and implement a menu feature using Unity
- Assisted in implementing the user interface of the game menu
- Wrote clean, efficient and well-documented code to meet the company's best practices
- Used the 3D assets in Unity and C# to develop the game menu and integrate it into the game environment

Education

Bachelor of Computer Science – Software Development

March 2021 – November 2023

Swinburne University of Technology, Melbourne VIC

- Relevant coursework: Object-Oriented Programming, Software Development in Mobile Devices, Managing Software Projects, Algorithms and Data structure, Software Deployment and evolution, etc.
- GPA: 3.55/4.0

Master of Information Technology – Software Development
Deakin University, Melbourne VIC

March 2024 – July 2025

- Relevant coursework: Professional practices in IT

Language

- English: Intermediate proficiency
- Mandarin: Native proficiency
